

## Drive® XLR8 Herbicide

### **Broadleaf and Grassy Weeds Controlled by Drive XLR8.**

**Drive XLR8** effectively controls:

- >> Bindweed
- >> Clover
- >> Crabgrass
- >> Dandelion
- >> Dollarweed
- >> Foxtail
- >> Kikuyugrass
- >> Signalgrass
- >> Speedwell
- >> Torpedograss

**Drive XLR8** even controls crabgrass in the mature stages — four tillers or more. And **Drive XLR8** provides outstanding residual control for up to 30 to 45 days with a single application.

### **Where To Use Drive XLR8.**

**Drive XLR8** is labeled for use in: residential, commercial and industrial turfgrasses, golf courses, sod farms, sports and recreation fields.

Refer to product label for additional information.

### **Keys to Success.**

Spray coverage should be uniform and complete. It is recommended to not mow two days before or after application. Irrigation may improve weed control, if soil moisture is not sufficient. **Drive XLR8** may be tank-mixed with other pre- and postemergent grass herbicides, along with postemergent broadleaf herbicides.

Refer to product label for additional information.

### **Watch the Drive XLR8 Time Lapse Video.**

This video shows Drive XLR8 on crabgrass over a 10-day period. To play, click on the Featured Video in the right column.
