### **Where To Use Onetime.**

**Onetime** is labeled for use in: golf courses, athletic fields, residential and commercial lawns, parks, playgrounds, cemeteries, school grounds, roadsides, airports, picnic grounds, military and other institutions.

Refer to product label for additional information.

### **Keys to Success.**

**Onetime** can be applied to almost all turfgrasses (not labeled for putting greens or collars — refer to label for more information). Do not water for 24 hours. Avoid extreme temperatures (apply when temperatures are between 50° F and 80° F). A sequential application may be required for complete control. **Onetime** can be tank-mixed with a number of other commonly used products. Perform a jar test to determine compatibility. For extended grass activity, **Onetime** can be tank-mixed with **Pendulum® herbicide** to enhance residual control.

Refer to product label for additional information.

### **Watch the Onetime Time Lapse Video.**

Onetime controls nearly 70 weeds including crabgrass, dandelion and white clover. See how well these last three weeds are controlled by watching this time-lapse video. To play, click on the Featured Video in the right column.
