

Trinity® Fungicide

Research Proves Value Of Trinity.

Research conducted by **Dr. Joe Vargas, Professor of Plant Pathology**, Michigan State University, showed **Trinity** to be one of the best SI (DMI) fungicides for the control of summer patch and anthracnose. Other university trials also prove the effectiveness of **Trinity** on a number of key turf diseases.

Try Trinity ... With Insignia

Add **Trinity** to your tank with **Insignia** for effective broad-spectrum control. You already know **Insignia** controls many key turf diseases and delivers long-term results (reducing your labor and materials costs). Now, with the broad-spectrum control of **Trinity**, you have an effective and economical tank-mix partner that delivers outstanding control of anthracnose, dollar spot, brown patch and more!

Learn more about **Insignia**.

Try Trinity ... With Emerald

In addition to effective dollar spot control, **Trinity** can be used in rotation with **Emerald** as an important tool in helping to delay the onset of resistance. Now you have the perfect one-two punch to knock out dollar spot.
